

SAFETY CABINET

Summary:

- Safety cabinets are suitable for storing chemicals like combustible liquid, flammable liquid and paint.

Features:

- The fire resistant security cabinet whole for the double-decked fire resistant steel plate structure, between two steel plates is separated 40mm, inner fills the special fire resistant material, and the fire protection function is more remarkable.
- Uses the high quality cold rolling steel plate, which can gain strength, the fire protection function is better.
- The bottom 50mm high liquid tight containment of cabinet body can greatly hold chemistry liquid leak.
- Exclusive "spill-catcher" shelves could bear 400 lbs steel safety can, which can prevent the corrosion and hold the liquid to leak.
- Durable and chemical resistant, non-lead epoxy resin paint is painted outside and inside, maximizing the effects of anti- chemical ability.
- Using three languages high identified labels, anti-corrosive.
- Dual fire resistant vents with built-in flash arresters strategically placed at both side of cabinets.
- Four adjustable "spill-catcher" horizontal shelves could guarantee the cabinet body steady.

Specifications:

Model	SC30	SC45	SC60	SC90
Color	Yellow/Red/Blue			
Capacity(gallon/liter)	30/114	45/170	60/227	90/340
Adjustable shelve(s)	1	2		
Door type	Double doors/manual			
Ext. Dimensions(H*W*D/mm)	1120*1090*460	1650*1090*460	1650*860*860	1650*1090*860
Int. Dimensions(H*W*D/mm)	1020*1010*375	1550*1010*375	1550*775*775	1550*1010*775
N.W.(kg)	100	138	165	190

REMARKS:

- Three color cabinets “Size is same with different function”
 - Yellow for Flammable liquids
 - Red for combustible liquids
 - Blue for corrosive liquids
